

## African Hall Gallery

African Hall, a central part of the new Tusher African Center, is both a dramatic recreation of exhibits beloved by generations of Academy visitors and a breath-taking new look at the biogeography and diversity of landscapes, plants, and animals of sub-Saharan Africa. The introduction of live animals adds even greater excitement and interpretive dimension to the exhibits. These live exhibits include African Penguins, Malawi Cichlids, White-throated Monitor Lizard, Jackson's Chameleons, Plated Lizards and Pancake Tortoises.

<i>Aulonocara</i> sp.	Strawberry Cichlid
<i>Chamaeleo jacksonii</i>	Jackson's Chameleon
<i>Cyrtocara moorii</i>	Cichlid
<i>Gerrhosaurus major</i>	African Plated Lizards
