

# Faces on the Moon

Take a look at this picture of the Moon. What do you see?

Is it all one color or are there differences?

We can see dark patches, white lines, and craters all over its surface.

Have you heard of the “Man in the Moon?” As people have looked at the Moon, some have imagined shapes and patterns out of the dark and light areas—even shapes that look like a person! Can you see a face? What else can you see? Here are some ideas of other pictures you might be able to see:

Use markers, pencils, or crayons to draw your own pattern or picture on the Moon.

Color in the *T. rex* riding a tricycle on the Moon.
